THE PREXOLID® IMPLANT SYSTEM

The PREXOLID® Implant System is designed for immediate loading, and is also suitable for all other treatment protocols ranging from immediate to conventional placement based on the dentist's preference. All PREXOLID® Products are manufactured with the latest state-of-the-art technology. The PREXOLID® Implant System is continuously being developed by the company's research and development team in collaboration with clinics, universities and dental technicians. The PREXOLID® Implant Systems are well documented scientifically. Test report support this with respect to a great many parameters including the implant surface, primary stability, and the connection design. The PREXOLID® Implant Systems, the perfection of ideal design and surface technology with high-performance material will bring you predictable results you expect.
